

Grateful Leadership in the Age of AI

Join us Thursday December 5th, 2024 at 1:00PM EST for the next appreciation webinar brought to you by the IIL Advantage Program, Grateful Leadership in the Age of AI with Judy Umlas.

In this webinar, we will embark on a journey that intertwines the principles of Grateful Leadership with the cutting-edge applications of Artificial Intelligence (AI). The session begins with an introduction to the key concepts of Grateful Leadership, such as the power of gratitude, the 5 Cs of Acknowledgment (Consciousness, Choice, Courage, Communication and Commitment), employee engagement, and the critical distinction between recognition and acknowledgment.

Next, we will connect these leadership principles with the role of AI in today's rapidly evolving landscape. We will explore how AI can be harnessed to enhance leadership qualities and foster a culture of appreciation within teams. Integrating Grateful Leadership and AI can lead to significant positive outcomes, such as improved employee morale, enhanced productivity, and more innovative business practices.

The session includes case studies from Google, Salesforce and Zappos, organizations that have successfully integrated Grateful Leadership, and AI.

Register now for the free live webinar (worth 1 PDU) and enjoy 30-day on-demand access. You will also be entered to WIN a \$ 300.00 Amazon Gift Card.
